

Hafen City Universität Metro Station 港口新城大学地铁站

Glass Tile 玻璃砖

Location: Hamburg, Germany
 Architect: Rupp Architekten
 Year: 2011
 Material & Quality: All shades of Blue color Glass tile with
 Thickness: 20mm
 Project Coverage: Hafen City Universität Metro Station is a direct station of the Hamburg U-Bahn network in the district of HafenCity in central Hamburg, Germany. The design makes reference to the port center's industrial past.

Project Description: The station's interior features a large-scale blue glass wall, which serves as a visual connection to the port's industrial history. The design also includes a series of blue glass panels on the ceiling and walls, creating a sense of depth and light.
