保养使用指南

一、保养

1、日常维护只需用海绵、加中性清洁剂擦拭，就能保持清洁；要消毒，可用稀释后的日用漂白剂（与水调和1:3或1:4）或其他消毒药水擦拭其表面；清洁后，用毛巾及时擦去水渍，尽量保持台面的干燥。

2、因水中含水垢、强氧化剂（氯离子），水在橱柜台面长时间停留会产生难以去除的污渍；用电吹风吹干，几个小时或几天后，污渍会慢慢消失；细小的白痕可用食用油润湿干抹布轻擦表面去除。

3、出现细小污渍，可用中性洗洁剂，喱状牙膏擦拭。

二、护理

一些顽固污渍的去污步骤，要根据板材表面的抛光程度而定：

1、亚光表面：用去污性清洁剂圆圈打磨，然后清洗，再用干毛巾擦干；隔一段时间用百洁布把整个台面擦拭一遍，使其保持表面光亮。

2、半亚光表面：用百洁布蘸非研磨性的清洁剂圆圈打磨，再用毛巾擦干，并用非研磨性的抛光物来增强表面光亮效果。

3、高光表面：应海绵和非研磨性的亮光剂磨；特难除去的污垢，可用1200目的砂纸打磨，然后用软布和亮光剂或家具蜡提光。

其它具体保养细节见《康洁利用户保养手册》

Maintenance instruction

A. Maintenance

1. Daily maintenance can be kept clean by wiping with a sponge and a neutral detergent. To disinfect the surface with diluted bleach (mixed with water 1:3 or 1:4) or other disinfectant. After cleaning, wipe off the water stains with a towel and try to keep the table dry.

2. Due to limescale and strong oxidizer (chloride ion) in water, if water stay on the cabinet countertop surface for a long time will produce stubborn stains; Drying with an electric hair dryer, a few hours or a few days later, stains will disappear slowly; Tiny specks can be removed by wiping the surface with a wet duster cloth.

3. For small stains, use neutral detergent and gel toothpaste to wipe.

B. Clean

The cleaning steps of some stubborn stains should be determined according to the degree of polishing of the slabs:

1. Matte surface: Using detergent to burnish in a circle, washing it and then dry with a dry towel; Wipe off the whole countertop over a period of time to keep the surface bright.

2. Semi-matte surface: Using a scouring pad with non-abrasive detergent to burnish in a circle, then dry with a towel, and use non-abrasive polishing material to enhance the surface brightness effect.

3. High glossy surface: Using a sponge and non-abrasive brightener to burnish; Dirt that is hard to remove, can be sanded with a 1200 mesh sandpaper, then polished with a soft cloth, brightener or furniture wax.
